

Ideation Paper

1.) My goal is to make a portfolio website. I want to be able to show a small information about me and showcase my project and my design in the website. I believe that it can help me see my works in action.

2.) I expect my website to be able to support some animation. I want to be able to put little animations when scrolling through the page.

3 & 4.)

- <http://socialking.ru>
- <https://boy-coy.com/#apps>
- <https://www.madwell.com/brief>
- <https://www.recapafteruse.co.uk>
- <https://timeslot-2019.webflow.io>

- I really loved how each of these websites was creative. All of these websites are scroll down with animations that I really want to put on my portfolio. They were able to portray the designs in different ways too.
